What does the Integration Leader do?

1. **Manage the chaos**
   - Establish and run day-to-day integration mechanics, planning and implementation processes
   - Coordinate all among and between all functional resources and work-streams

2. **Architect the successes**
   - Provide focus and direction
   - Identify and adopt best practices
   - Ensure value preservation, capture, optimization

3. **Accelerate the process**
   - Manage pace and momentum of the integration
   - Push for timely decisions and actions
   - Provide accountability for deadlines

4. **Personally drive the change**
   - Issue identification and resolution
   - Ambassador and lightning rod
   - Communicate and connect
